NOTE; All model wheel hubs are also available in 4/110 bolt pattern (as well as some other special combinations - please consult the price sheet).
Graph-lite "EZ Fit" spacers do not require stud removal for installation. These must be used when access to the inside of the hub is limited. Use for superior fit and assembly.

Graph-lite "GL" spacers require that the studs be removed from the hub for installation and long "through bolts" (supplied) inserted in the stud hole.
