

# Instructions; Suzuki LT-R450 Front Lowering Kit

Part Number 20-1015

Facing the front,  
this is the left side.

Facing the front,  
this is the right side.

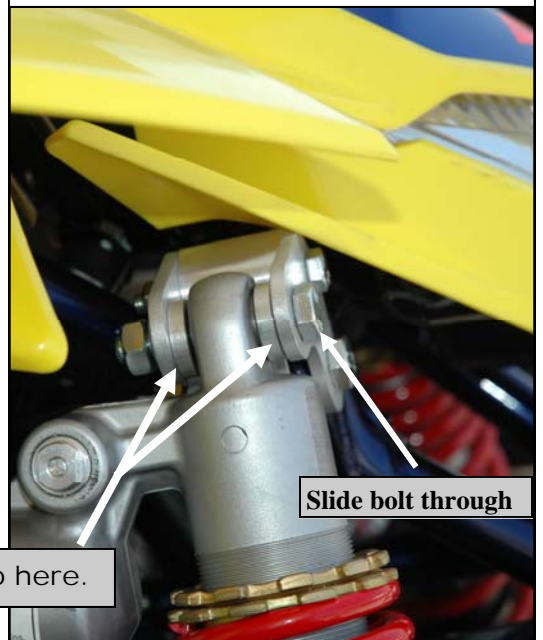

Bolt kit only:  
20-1006bk

**Note: Make sure you have received a complete kit. The picture (top left) shows all the parts and how they go together.**

1) **Raise the front end of the quad so the front wheels are off the ground.**

Facing the front, this is the left side.

Slide bolt through

Front right side shock mount.

Remove upper shock  
mount bolt.

2) **Remove the upper shock bolt and swing the shock away from mounting bracket.**

3) **Slide the aluminum mounting block onto the shock mounting bracket with the angle to the inside of the ATV. (Note the picture below)**

Aluminum spacers go here.

4) **Install the shock mounting plates (front and rear) using the 10mm bolt in the original shock position and the 8mm bolt in the upper position. 5) Install the shock in the new mounting position using the aluminum spaces and the other 10mm bolt. 6) Repeat the same process on the other side. 7) Tighten all bolts and lower the ATV. Note: Be sure to check suspension for proper action.**

**This is how your lowering kit should look when you're done! ▶ Bounce front up & down, check for binding!**

**Note: The front lowering kit is designed for flat track or ice racing. This kit is not recommended for jumping. For further inquiries call our tech support hotline M-F, 8 to 5 PST. 949-770-5533**
